# PROGRESSIVE BUILDING SUPPLY, LLC

*The Cutshop*

*Custom Fabricator of Quality Millwork*

## Custom Service at the Right Price

- Custom Templating
- ART CAD In-house Design
- CNC Machining
- Optimized Panel Cutting
- High Speed Edge Banding

Progressive Building Supply has been providing millwork to residential and light commercial clients since 2002. Our fabricating shop was first established to offer our clients expanded capabilities in custom millwork.

But we saw the need for larger scale, cut-to-size fabricating. With his 23 years experience in millwork distribution and manufacturing, it did not take long for owner, Mark Pollari, to evolve the shop into a full manufacturing division.

We provide a wide range of cutting and fabricating services including: precision CNC routing, computer controlled panel cutting, edge banding, and assembly. Our knowledgeable staff is ready to assist, whether you need just one part or hundreds of thousands. We built our business upon aggressive pricing and customer service. It would be an honor to quote your next project.

Panel Saw

Mortised Cedar Millwork, pre-assembled in-house to Architect's Specifications

*"...whether you need  
just one part  
or 100,000"*
